Sexual Assault Response Team (SART) is made up of specially trained individuals who, at the individual’s request, respond together to provide victim-centered services after a sexual assault. SART uses a team approach in providing compassionate, comprehensive medical care, emotional support, information, assistance, evidence collection, and investigation of the incident.

The members of the SART include:
- Sexual Assault Nurse Examiner (SANE): a Registered Professional Nurse (RN) with specialized training in caring for and examining victims of sexual assault. The SANE provides comprehensive and sensitive medical care, while ensuring that forensic evidence is properly collected in a timely manner.
- Sexual Assault Support Advocate: an advocate with specialized training in the area of sexual assault. The Advocate provides emotional support for victims and their significant others, information reporting, treatment and counseling options and is available to accompany the victim during medical, legal, and court procedures. All services of the advocate are free, confidential, and available regardless of whether or not the victim is reporting the assault.
- and, if desired, a law enforcement officer: with specialized training in the area of sexual assault investigation and working with sexual assault victims.

SART Services include:
- Information about reporting treatment and evidence collection options.
- A medical evaluation to detect injuries and provide treatment.
- Comprehensive forensic evidence collection.
- Sexually Transmitted Infection (STI) and Pregnancy evaluation and treatment.
- Crisis intervention and support.
- Information about victim services, including counseling.
- Medical, legal, and court accompaniments.

When are SART Services available?
SART Services are available 24 hours a day, 365 days a year.
